EXECUTIVE SUMMARY

DIRECT ECONOMIC IMPACT

- The University of Arkansas Athletic Department made expenditures worth $84.7 million during the 2010-11 academic year. The economic impact of these expenditures was estimated to be $124.1 million for the statewide economy on an annual basis.

- Payroll at the Athletic Department was $28.6 million and supported the employment of 260 on a full-time basis and 982 on a part-time or hourly basis.

VISITOR ECONOMIC IMPACT

- During the 2011-12 academic year, more than 1 million fans attended sporting events on the University of Arkansas campus. Over the course of 60 game days, nearly 720,000 people attended baseball, basketball and football games in Fayetteville and about 342,000 of these attendees (47.5 percent) were from outside Northwest Arkansas.

- This economic activity resulted in the renting of 35,805 hotel or motel room nights and the purchase of over 1 million meals in Northwest Arkansas.

- The overall economic impact of these visitors is estimated at nearly $30 million dollars for the 2011-12 season.
  
  - The average baseball game generated $62,036 in visitor spending.
  - The average basketball game generated $137,686 in visitor spending.
  - The average football game generated $4,900,437 in visitor spending.

- These visitors generated $1.77 million in state sales taxes and $0.88 million in local sales taxes for a total of at least $2.66 million dollars for the state and local governments.

CONSTRUCTION ECONOMIC IMPACT

- Athletic facilities construction activity on the University of Arkansas campus between 2002 and 2011 generated 2,024 direct jobs and 3,342 total jobs when indirect and induced jobs are included. The overall impact of the construction during this time period was $288.7 million.
• Construction activity in 2012 generated 340 jobs in direct employment and 561 jobs in overall employment when indirect and induced jobs are added. The overall economic impact of the construction activity of the Athletic Department is estimated at $64.5 million. Projected five year athletic facility construction activity, worth $150 million in 2012 dollars, will generate 1,221 jobs in direct employment and 2,016 jobs in overall employment when indirect and induced jobs are added. The overall economic impact of the planned construction activity of the Athletic Department is estimated at $239.7 million.

OVERALL ECONOMIC IMPACT

• Researchers estimate the economic impact of the activities of the University of Arkansas Athletic Department at $153.6 million on an annual basis.

• The Athletic Department expended $84.7 million and produced a $124.1 million economic impact, and visitors to home baseball, basketball and football games generated an additional $29.6 million. These figures comprise the annual economic impact1.

• The economic multiplier associated with this impact is 1.81, which means that every dollar in Athletic Department expenditures generated $1.81 in economic activity.

• As part of this economic impact, activities of the Athletic Department generated tax revenues worth at least $3,723,606 for the state government and $1,172,312 for local governments.

• The football games in the fall produce a significant impact on hotel occupancy rates, associated hotel tax collections and restaurant prepared food taxes. Hotel tax collections in Northwest Arkansas cities are typically 14.6 percent higher in the fall months compared to the rest of the year. Similarly, hotel occupancy rates are 5.4 percent higher in the fall and restaurant prepared food taxes are 2.5 percent higher in the fall when compared to the rest of the year.

• Construction activity from the University of Arkansas Athletic Department also provided and will continue to provide significant one-time benefits. From 2002 to 2011, athletic facility construction on the University of Arkansas campus created 3,342 jobs and generated $288,653,131 in economic impacts. Year 2012 construction on the University of Arkansas campus supports 561 jobs and generates an economic impact of $64,517,706 and planned construction from 2012 to 2017 will support 2,016 jobs and generate $239,740,103 in economic activity.

---

1 Expenditures came from 2010-11 data, while visitor impact came from the 2011-12 season. Assuming that expenditures remained constant, this estimate represents the annual impact.

The University of Arkansas Athletic department houses one of the premier programs in America. With its rich history, dedicated fans, highly touted athletes, and top-notch coaches and administrators, the University of Arkansas epitomizes a college athletic program in the early twenty-first century.

In 1909, the University of Arkansas Cardinals faced Louisiana State University in a grinding football match. In what is one of the most memorable statements in the University’s rich history, Arkansas football coach Hugo Bezdek called his players “a wild band of Razorback hogs” after defeating LSU 16-0. The razorback is known as a wild fighting, tenacious boar with a ridged back. This new nickname for the football team spread throughout the student body and became more popular each day until they voted to change the official University mascot to the Razorback the very next year. Perhaps one of the most famous aspects of the University’s athletic program, the “Hog Call”, heard as “Woooooo, Pig Sooie!” was added in the early 1920’s.

The University of Arkansas participates in the Southeastern Conference (SEC), undoubtedly the nation’s most competitive conference. The conference boasts 7 of the last 8, including the last 5, NCAA football national champions. The SEC also is represented by the past 3 NCAA baseball national champions, the last 2 NCAA Men’s Indoor Track and Field national champions, and 6 of the last 7 NCAA Women’s Gymnastics national champions. Arkansas leads all SEC schools in career NCAA national championships with 42 (tied with LSU). The Razorbacks compete in 19 different sports with more than 460 student-athletes representing the "Razorback Nation" on and off the field. In 2010-11, University of Arkansas teams boasted 5 SEC or Regional team champions, appeared on television 107 times, and attracted over one million fans to home games.

In 2011-12, fifteen of 19 Razorback sports advanced to post-season competition including six programs that finished in the top-10 nationally in their respective sports. The University of Arkansas finished the year 20th in the Learfield Sports Directors Cup, a season-long measure of athletic success of all Division I athletic programs. It marked the highest finish for the program in the Directors Cup in more than a decade. The men’s track and field team captured the SEC Triple Crown (cross country, indoor and outdoor track and field) while the football team clinched a Cotton Bowl victory. Arkansas’ baseball team made a trip to the College World Series and the gymnastics team returned to the NCAA Super Six.

Arkansas once again played host to more than one million fans for Razorback athletic events in 2011-12. In fact, the University of Arkansas was the only institution to rank in the top 25 of national attendance for football, men’s basketball and baseball in 2011-12. In
addition, Razorback teams made 101 national and regional television appearances in 2011-12.

The University of Arkansas Athletic Department is a valuable and visible institution in the state of Arkansas and particularly in the Northwest Arkansas region where the Arkansas Razorbacks make their home. The success and recognition of the University’s Athletic programs bring many fans to attend various athletic events and activities surrounding those events. The Athletic Department is interested in determining the economic impacts of various operations conducted by the department. This study will increase the understanding of economic impacts within the Department and provide a useful communication tool for interactions with alumni, faculty and staff, taxpayers, business owners and others. This economic impact study also provides a standard to compare against peer institutions that have completed similar studies. Some of these institutions are the University of Alabama, Louisiana State University, the University of South Carolina, and the University of Tennessee, among others.

The Center for Business and Economic Research in the Sam M. Walton College of Business at the University of Arkansas was approached by the Athletic Department to conduct an economic impact study of its operations and the visitor impacts associated with the athletic events held on the University of Arkansas campus. This study examines the economic impact of the athletic department from three broad categories of activities that produce economic impacts. The first category presented in this study is the direct economic impacts of the operations of the University of Arkansas Athletic Department, using annual expenditures of the department and the associated economic impact. The second category is based on visitor spending at home games on the University of Arkansas campus in Fayetteville. In this study, only visitor impacts from home baseball, basketball and football games are assessed. Finally, the third category is based on the construction expenditures of the University of Arkansas Athletic Department. While the first two categories produce recurring annual impacts, the third category generates one-time economic impacts. The following pages of this report provide a detailed analysis of the above mentioned categories.
DIRECT ECONOMIC IMPACT DATA

This section presents the direct economic impacts of the University of Arkansas Athletic Department by detailing its expenditures and revenues. Most of the information presented in this section is based on data from the 2010-11 academic year, for which the most complete information is available. Where available, 2011-12 numbers are used for a more current view of economic activity.

EXPENDITURES

A major portion of the economic impact of the University of Arkansas Athletic Department is derived from the expenditures of the department. The expenditures take the form of payroll, event and team expenses, marketing and promotions, and facilities expenses, among others. These expenditures generate economic activity in Northwest Arkansas and provide the organization with a sustainable base of the economic activity for the area. Using IMPLAN, an input-output based estimation model, researchers from the Center for Business and Economic Research were able to measure the economic impact of the Athletic Department expenditures on the State’s economy.

PERSONNEL

The Athletic Department provided employment both full-time and part-time to 1,242 individuals on the University of Arkansas campus during the 2011-12 academic year. Full-time staff at the athletic department number about 257 and includes head coaches, assistant coaches, and administrative staff which includes those who handle training for various sports, recruitment, finances and other activities that are essential to the smooth functioning of a quality athletic department. In addition, three merchandise staff work on a full-time basis. Event staff members who manage the various home Athletic events are hired on a part-time basis and 657 were used in the 2011-12 season. Additionally, 233 parking attendants, 24 concessions staff and 68 merchandise staff were also hired on a part-time basis to facilitate the operations of the athletic department associated with home game days.

PAYROLL

According to data received from the University of Arkansas Athletic Department, the department spent $28,642,572 on payroll in the 2010-11 academic year. Out of these total payroll expenditures, $12,100,058 was spent on salaries and other compensation for head coaches and assistant coaches, while $10,426,885 was spent on salaries and other compensation for all other athletic department staff. The head coaches and assistant coaches received $2,112,548 in benefits like medical insurance, leave, retirement plans, and other benefits, while administrative staff received $2,174,567 in similar benefits. Finally, wages for event staff, parking attendants, and other part-time and hourly workers totaled $1,828,514 in the 2010-11 academic year.

TAXES PAID BY ATHLETIC DEPARTMENT EMPLOYEES

Using the salary data provided by the Athletic Department, researchers from the Center for Business and Economic Research were able to estimate the various state and local taxes paid by employees that work in the Athletic Department. Income taxes paid by Athletic Department employees were calculated based on the salaries and other compensation for full-time staff, and the wages for part-time staff. Full-time staff at the Athletic Department
paid an estimated $1,360,696 in state income taxes based on the salaries and other compensation received in the 2010-11 academic year. Part-time employees paid an estimated $18,285 in state income taxes during the same time period. Both full-time and part-time employees paid a combined estimated total of $569,918 in state sales taxes on consumption goods and $284,959 in local sales taxes on these goods. The state and local sales tax payments were estimated based on the percentage of income that is typically subject to sales tax, 39 percent, according to estimates available from the U.S. Bureau of Labor Statistics Consumer Expenditure Survey.

**UNIVERSITY AFFILIATED VOLUNTEER HOURS BY STUDENT-ATHLETES**

The University of Arkansas Athletic Department promotes a spirit of volunteerism among its student-athletes and student-athletes participate in a variety of volunteer activities every academic year. Community service performed by the students has taken the form of providing tours to school children, working with local Boys and Girls Clubs, cleaning up from the Joplin tornado, helping the Animal Services Vet Clinic, soup kitchens, Big Brothers/Big Sisters, and many others. In the 2011-12 academic year, student-athletes performed 5,991.5 hours of community service. Using the value of one hour of community service provided by Independent Sector ($16.48 in Arkansas), we can estimate that the total value of community service performed by student-athletes was $98,740.

**STUDENT AID**

The Athletic Department provides financial aid to student-athletes from the various sports represented at the University of Arkansas. The student aid takes the form of tuition discounts and waivers during the regular semester and for summer school. The expenses also reflect aid extended to student-athletes who are no longer eligible to participate in athletics and to student-athletes who may be inactive due to injury. The men’s football team has the largest number of recipients of student aid, 85, followed by track, field and cross country at 64 and basketball at 26. A total of 25 scholarships are given to athletes in swimming, followed by 22 in soccer, gymnastics and baseball. In all, 326 scholarships are
given out, 171 to male athletes and 155 to female athletes. The value of the aid disbursement was $7,442,929 in the 2010-11 academic year. Student aid expenditures to men’s football were $2,580,733 and were followed by $482,884 in student aid expenditures for women’s basketball. Men’s basketball received $430,827, and baseball received $329,789. All other sports received a total of $3,450,736 in student aid.

**RECRUITING AND SPIRIT GROUPS**

The Athletic Department spent $1,480,557 during the 2010-11 academic year in expenditures related to the recruiting efforts for student-athletes. These expenditures cover transportation, lodging and meals for prospective student-athletes and Athletic Department personnel who are on both official and unofficial recruiting trips. The Athletic Department also spent $1,037,704 on spirit groups that are present at different athletic events. These include payments for the groups of cheerleaders, band, mascots and dancers, among others.

TEAM AND GAME DAY EXPENSES

During the 2010-11 academic year, the Athletic Department spent a total of $7,357,945 on travel related expenses for the various sports teams that represent the University of Arkansas. The travel expenditures were made on air and ground travel, lodging, meals and incidentals for travel made during preseason, regular season and post season. These amounts also reflect lodging and meals expenditures for teams that are sequestered prior to home games. Team travel expenditures of the football team were $3,257,936 during the 2010-11 academic year. The Athletic Department spent $2,316,284 on equipment that was provided to teams and an additional $1,145,848 on medical expenses and medical insurance for teams representing the University of Arkansas. During game days on the University of Arkansas campus, the Athletic Department incurred expenses valued at $4,469,543 to provide services like officials, security, event staff, ambulance and other such services.

MISCELLANEOUS EXPENSES

The University’s Athletic Department made several other expenditures such as guarantees, valued at $2,598,328 that were paid to visiting teams from other institutions. Other expenses included fund raising, marketing and promotion which includes media guides, brochures, recruiting publications and other such items. These expenses accounted for $1,686,190. Facilities costs which include building and grounds maintenance, utilities, rental fees, operating leases, equipment repair and maintenance, and debt service accounted for $12,185,650 during the 2010-11 academic year.

SUMMARY OF ALL EXPENSES AND ECONOMIC IMPACT OF EXPENDITURES

In total the University of Arkansas Athletic Department made expenditures of $84,748,274 during the 2010-11 academic year. Expenses related to the football program equaled $24,059,191 and represented the largest expenses for a single sport. A table summarizing the expenses of the University of Arkansas Athletic Department for the 2010-11 academic year is provided in the following table.

Source: University of Arkansas Athletic Department Information
Using information on aggregate expenditures associated with the Athletic Department, researchers from the Center for Business and Economic Research used IMPLAN to generate an economic impact estimate for these expenditures outlined above.

IMPLAN employs an input-output approach to evaluate the economic impact of university spending activity in the state of Arkansas. This regional impact model enables the evaluation of the economic impact of specific activities like university spending within an economy. The basic data sources for the current edition of the IMPLAN database and the model used in this study are the Input-Output Accounts of the United States, developed by the U.S. Department of Commerce, Bureau of Economic Analysis (BEA), and county income and employment data published by BEA and the Bureau of Labor Statistics (BLS). The model reflects 2010 industrial structure and technology, and 2010 prices (trade flows in the model are expressed in 2010 dollars) but economic impacts can be presented in current dollars. IMPLAN uses a 525-sector input/output model to measure the effects of three types of impacts: direct, indirect, and induced. Direct impacts consist of employment and purchases of goods and services in the region resulting from the activity being evaluated, in this case, spending by the University of Arkansas Athletic Department. Indirect (inter-industry) impacts consist of goods and services purchased by the firms, which supply inputs consumed in the direct activity. Induced impacts consist of increased household purchases of goods and services in the region by employees of direct and indirect employers. The model generates multipliers, which summarize the magnitude of the indirect and induced effects generated by a given direct change, to estimate changes in output, income, and employment. In other words, the multiplier is the ratio of total impact to direct impact.

The economic impact of the operations of the University of Arkansas Athletic Department for the 2010-11 fiscal year is estimated at $124,065,968. This impact reflects the effects of the Athletic Department expenditures that are indirect as well as induced. While the Athletic Department employs 260 full time employees, the indirect and induced effects created by the Athletic Department expenditures result in a total of 583 jobs created in the state economy.

REVENUES

The operation of the University of Arkansas Athletic Department is made possible by revenues generated from multiple sources that pay for all the expenses of running the department. The University of Arkansas Athletic Department is one of very few athletic departments in the United States that is entirely self-sufficient and produces enough revenues to cover the annual expenditures of the department. The following section outlines the sources of revenues for the University of Arkansas Athletic Department during the 2010-11 academic year.

HOME ATHLETIC EVENT TICKET SALES

Ticket sales at home athletic events provided the largest source of revenues for the Athletic Department in the 2010-11 academic year. Attendees at the home games generated $35,931,551 for the Athletic Department, which was 40 percent of the total revenue. The vast majority of the ticket sales were generated by football, which brought in revenue of $28,479,575. This was followed by $5,810,167 from men’s basketball and $1,496,550 from baseball. The revenue shown in the table below represents season tickets, single game tickets, and suites at the home game.

TOURNAMENTS, CONFERENCES, AND GUARANTEES

The University of Arkansas Athletic Department received $22,024,152 in revenues from conferences and tournament revenues that Arkansas Athletics teams participated in. This amount was the second largest source of revenue for the Athletic Department and accounted for 24.5 percent of the total revenue for the department. The Athletic Department also received $51,700 in guarantees for participation in away games.

DONORS

Contributions to the University of Arkansas Athletic Department constituted the third largest source of revenues for the 2010-11 academic year. Contributions amounted to $19,962,064 and represented 22.2 percent of the total revenue of the Athletic Department. The contributions came from individuals, corporations, associations, foundations and clubs or other organizations that are designated. The amount of contributions also includes in-kind contributions such as the use of automobiles, provision of soft drinks, and other items.

ROYALTIES, LICENSES, SPONSORSHIPS, MEDIA BROADCASTS, AND OTHER SALES

The Athletic Department received revenues of $1,786,262 from the sale of game programs, novelties, food and concessions and parking revenues. In addition, the Athletic Department received $7,960,239 in revenue from corporate sponsorships, licensing, sales of advertisements, trademarks and royalties. The Athletic Department also received revenues directly for radio and television broadcasts as well as internet and e-commerce rights that are negotiated through direct contracts with the University. The amount received in this category was $1,075,000 in the 2010-11 academic year.

### SUMMARY OF ALL REVENUES

In total, the University of Arkansas Athletic Department generated revenues of $89.9 million from sources outside the University of Arkansas during the 2010-11 academic year. The football program was the largest source of revenue, providing some $60.5 million to the Athletic Department. Basketball provided the second largest source of revenue at $14.5 million. Together, these programs provided 83.4 percent of all the revenue at the Athletic Department.

Source: University of Arkansas Athletic Department Information

MEASUREMENT OF INDIRECT ECONOMIC IMPACTS

A major effect of the operations of the University of Arkansas Athletic Department is felt in the economic impact generated by fans who are visiting Fayetteville and Northwest Arkansas to attend home games. Nearly 720,000 fans attended home baseball, basketball and football games during the 2011-2012 season and about 342,000 of those fans were visitors to Northwest Arkansas. These fans generate substantial expenditures at restaurants, hotels, retail, and gasoline stores, providing an important stimulus to the
Northwest Arkansas economy. This section of the report captures the off-campus Northwest Arkansas spending of fans associated with home baseball, basketball and football games during the 2011-12 academic year. The spending estimates of fans attending these games do not include any expenditures made in purchasing tickets to the games or merchandise, and concessions purchased at the stadiums and arenas, as these expenditures are explained in detail in the preceding section. In addition, the spending of fans attending other sports such as women’s basketball, soccer, gymnastics and other sports is not captured in this study.

Estimating spending in Northwest Arkansas by visitors at the home games was achieved through the collection of primary data from visitors in the form of survey responses. Researchers from the Center for Business and Economic Research developed a survey instrument that captured the economic activities of visitors to the home games in baseball, basketball and football. University of Arkansas students hired by the Center for Business and Economic Research surveyed people at the baseball, basketball and football games using this survey instrument. A copy of the survey instrument is provided in the Appendix. The students surveyed baseball and basketball patrons for an hour prior to the game and during a part of the game as well. Baseball and basketball visitors were surveyed near the parking lots prior to the game and in the arena/stadium concourses during a part of the games. Visitors to home football games were surveyed in the parking lots and tailgating hours beginning three hours before each home game. The data collected during the survey process included the origin (hometown) of the game attendee (only patrons from outside Northwest Arkansas were given the full survey), the size of the attending party, the lodging arrangements of the party, the meals eaten by the party, other plans for each party and the total spending by visitors to the area. Using these survey responses, researchers from the Center were able to extrapolate the spending patterns for all visiting home game attendees.

In addition, secondary data like Northwest Arkansas sales tax collections, hotel tax collections, food tax collections and hotel occupancy rates were collected to show the effects of visitor attendance at home football games. In this section of the report, the primary data from surveys of visitors at baseball, basketball and football games are summarized, followed by the presentation of the secondary data on sales tax collections and hotel occupancy rates in Northwest Arkansas. The extrapolated data on visitor spending are presented separately for each sport surveyed, namely, baseball, basketball and football, but first, a short summary of the individual games surveyed is presented. The final section has data on sales tax, food tax, hotel tax and hotel occupancy rates for each of the four major cities in Northwest Arkansas.

**BASEBALL**

Students from the Center for Business and Economic Research were present at seven baseball games (from three series) to survey patrons that were attending the games. One game each, from the first and last series surveyed was rescheduled to the same day as another game for weather related reasons. In this instance, only the first game of the double header was surveyed. The range of games surveyed allowed researchers from the
Center to get spending data for various days of the week and this information was used to extrapolate spending estimates for games that were not surveyed based on the day of the week. Surveyors were also able to collect information on conference and non-conference games, so spending patterns from these types of games were also used when extrapolating spending for games that were not surveyed. Non-conference games were played on several days of the week, but conference home games were only played on weekends. In all, there were 33 game days with home baseball games in Fayetteville during the 2012 season. Short summaries are provided for each of the individual games surveyed, followed by detailed tables on spending estimates for every home baseball game.

**SUMMARY OF SURVEY RESULTS: ARKANSAS V BINGHAMTON (MAR 9)**

According to information gathered from surveyors from the Center for Business and Economic Research, 12.2 percent of game attendees were from outside Northwest Arkansas. This means that of the 2,877 individuals who attended the game, **351 were from outside Northwest Arkansas**. The game was played at 3:05 pm on a Friday. The average visitor from outside Northwest Arkansas spent $67.12 during the visit. Center researchers estimate that these individuals spent a total of **$23,190** in the Northwest Arkansas economy. The out-of-region visitors used **44 hotel or motel room nights**.

**SUMMARY OF SURVEY RESULTS: ARKANSAS V BINGHAMTON (MAR 10)**

According to information gathered from surveyors from the Center for Business and Economic Research, 14.3 percent of game attendees were from outside Northwest Arkansas. This means that of the 6,523 individuals who attended the game, **935 were from outside Northwest Arkansas**. The game was played at 1:05 pm on a Saturday. The average visitor from outside Northwest Arkansas spent $54.56 during the visit. Center researchers estimate that these individuals spent a total of **$50,990** in the Northwest Arkansas economy. The out-of-region visitors used **33 hotel or motel room nights**.

**SUMMARY OF SURVEY RESULTS: ARKANSAS V GEORGIA (APR 6)**

According to information gathered from surveyors from the Center for Business and Economic Research, 19.0 percent of game attendees were from outside Northwest Arkansas. This means that of the 9,033 individuals who attended the game, **1,718 were from outside Northwest Arkansas**. The game was played at 6:35 pm on a Friday. The average visitor from outside Northwest Arkansas spent $52.21 during the visit. Center researchers estimate that these individuals spent a total of **$89,721.48** in the Northwest Arkansas economy. The out-of-region visitors used **86 hotel or motel room nights**.

**SUMMARY OF SURVEY RESULTS: ARKANSAS V GEORGIA (APR 7)**

According to information gathered from surveyors from the Center for Business and Economic Research, 20.6 percent of game attendees were from outside Northwest Arkansas. This means that of the 8,479 individuals who attended the game, **1,749 were from outside Northwest Arkansas**. The game was played at 2:05 pm on a Saturday. The average visitor from outside Northwest Arkansas spent $59.59 during the visit. Center
researchers estimate that these individuals spent a total of $104,741 in the Northwest Arkansas economy. The out-of-region visitors used 98 hotel or motel room nights.

**SUMMARY OF SURVEY RESULTS: ARKANSAS V GEORGIA (APR 8)**

According to information gathered from surveyors from the Center for Business and Economic Research, 17.0 percent of game attendees were from outside Northwest Arkansas. This means that of the 6,973 individuals who attended the game, 1,187 were from outside Northwest Arkansas. The game was played at 12:05 pm on a Sunday. The average visitor from outside Northwest Arkansas spent $85.81 during the visit. Center researchers estimate that these individuals spent a total of $101,885 in the Northwest Arkansas economy. The out-of-region visitors used 148 hotel or motel room nights.

**SUMMARY OF SURVEY RESULTS: ARKANSAS V KENTUCKY (APR 13)**

According to information gathered from surveyors from the Center for Business and Economic Research, 16.8 percent of game attendees were from outside Northwest Arkansas. This means that of the 9,287 individuals who attended the game, 1,560 were from outside Northwest Arkansas. The game was played at 6:35 pm on a Friday. The average visitor from outside Northwest Arkansas spent $79.12 during the visit. Center researchers estimate that these individuals spent a total of $123,419 in the Northwest Arkansas economy. The out-of-region visitors used 135 hotel or motel room nights.

**SUMMARY OF SURVEY RESULTS: ARKANSAS V KENTUCKY (APR 14)**

According to information gathered from surveyors from the Center for Business and Economic Research, 16.2 percent of game attendees were from outside Northwest Arkansas. This means that of the 9,575 individuals who attended the game, 1,547 were from outside Northwest Arkansas. The game was played at 2:05 pm on a Saturday. The average visitor from outside Northwest Arkansas spent $64.17 during the visit. Center researchers estimate that these individuals spent a total of $99,288 in the Northwest Arkansas economy. The out-of-region visitors used 121 hotel or motel room nights.
Using the information from the surveys above, researchers from the Center were able to provide estimates of the number of visitors at home baseball games that came from outside Northwest Arkansas. On average, for non-conference home baseball games, 12.2 percent of game attendees on weekdays came from outside Northwest Arkansas and 14.3 percent of attendees on weekends came from outside Northwest Arkansas. Similarly, 17.9 percent of Friday attendees at conference games, 18.4 percent of Saturday attendees at conference games and 17 percent of Sunday attendees at conference games came from outside Northwest Arkansas. In all, of the 192,817 attendees at all home baseball games during the 2012 season, 30,967 or 16.1 percent of attendees came from outside Northwest Arkansas.

Source: University of Arkansas Athletic Department Information and Center for Business and Economic Research Estimates
Data collected from the surveys provided per person estimates of spending by visitors from outside Northwest Arkansas. On average, visitors at non-conference games spent $67.12 on weekdays and $54.56 on weekend game days. Meanwhile visitors at conference games spent $65.67 on Fridays, $62.03 on Saturdays and $85.81 on Sundays on average. When these data are extrapolated to reflect the spending patterns of 30,697 visitors from outside Northwest Arkansas, the visitors spent $2,047,173 in the Northwest Arkansas economy or an average of $62,036 per game. This spending only includes the expenditures of attendees outside the baseball stadium and, as such, does not include spending on tickets, merchandise and concessions.

SALES TAXES PAID BY VISITORS

Using the visitor spending data above, researchers were able to estimate the sales taxes paid by visitors to the Northwest Arkansas area who were attending home baseball games. For the purpose of this study, the spending per game was used to calculate sales taxes accrued to the state at the sales tax rate of 6.0 percent and the sales taxes accrued to county and local governments in Northwest Arkansas at an average rate of 3.0 percent. The estimate provided below is conservative as some localities have additional taxes collected for hotel and motel rooms and prepared food purchased. In addition, liquor excise taxes and gasoline taxes are also not estimated. The 30,967 visitors paid $122,830 in state sales taxes and $61,415 in local sales taxes for a total of $184,246 in sales tax dollars for this region.

*Local sales tax average of 3 percent is used

Source: Center for Business and Economic Research Surveys and Estimates
In addition, using data provided by the Athletic Department for the estimation, visitors and residents paid $45,153 in sales taxes to the state and local governments on the purchases of merchandise and concessions while inside the stadium. The sales tax rate used is from Fayetteville, since all merchandise and concession rates were made in Fayetteville. The local merchandise tax rate is 3.25 percent which reflects the Washington County and Fayetteville sales tax rate and the local concessions tax rate is 5.25 percent which reflects the Washington County, Fayetteville sales tax rate, and the Fayetteville prepared food tax.

### HOTEL ROOMS OCCUPIED BY VISITORS

Data from the surveys of visitors to home baseball games provided researchers from the Center estimates of the number of hotel or motel room nights occupied by visitors at the games. As expected, games on the weekend resulted in more hotel and motel rooms being occupied by visitors. In all, over the course of 33 game days, 2,511 hotel room nights were occupied by visitors to the region.

Source: Center for Business and Economic Research Surveys and Estimates
The survey instrument used by students from the Center for Business and Economic Research also collected data on the number of meals eaten by visitors at the home baseball games. Using this information, researchers estimated that the visitors at home baseball games ate 64,624 meals in Fayetteville and 4,933 meals in other Northwest Arkansas cities. The visitors ate 15,906 breakfasts, 24,490 lunches and 29,161 dinners in Northwest Arkansas for a total of 69,557 meals eaten over the course of 33 game days.

Source: Center for Business and Economic Research Surveys and Estimates
Visitors that responded to the surveys conducted by students from the Center for Business and Economic Research provided information about the plans of their parties during their visit to attend a baseball game. The information derived from the surveys about the plans of visitors is provided by location in Fayetteville or other Northwest Arkansas cities. Non-conference weekday games saw 64.0 percent of visitor purchase fuel in Fayetteville and 7.4 percent purchased fuel in other Northwest Arkansas cities. A total of 41.2 percent of visitors to non-conference weekday games also went retail shopping in Fayetteville, 22.8 percent purchased groceries or tailgating supplies and 11.8 percent went to bars and nightclubs. On weekends, 50.2 percent of visitors to non-conference games purchased fuel and 19.6 went retail shopping in Fayetteville. During conference games, 53.6 percent of visitors purchased fuel in Fayetteville on Fridays, 49.0 percent purchased fuel on Saturdays and 43.4 percent purchased fuel on Sundays in Fayetteville. Visitors to conference games on Fridays were more likely than visitors on Saturdays and Sundays to participate in retail shopping, buy groceries or tailgating supplies and visit bars and nightclubs.

Source: Center for Business and Economic Research Surveys and Estimates
Students from the Center for Business and Economic Research were present at seven Razorback basketball games to survey patrons that were attending the games. The range of games surveyed (weekday and weekend games) allowed researchers from the Center to get spending data for various days of the week and this information was used to extrapolate spending estimates for games that were not surveyed. In all, there were 22 game days with home basketball games in Fayetteville during the 2011-12 season. Short summaries are provided for each of the individual games surveyed, followed by detailed tables on spending estimates for every home basketball game.

**SUMMARY OF SURVEY RESULTS: ARKANSAS V MICHIGAN (JAN 21)**

According to information gathered from surveyors from the Center for Business and Economic Research, 27.0 percent of game attendees were from outside Northwest Arkansas. This means that of the 19,050 individuals who attended the game, **5,149 were from outside Northwest Arkansas**. The game was played at 1 pm on a Saturday. The average visitor from outside Northwest Arkansas spent $42.91 during the visit. Center researchers estimate that these individuals spent a total of **$220,947** in the Northwest Arkansas economy. The out-of-region visitors used **458 hotel or motel room nights**.

**SUMMARY OF SURVEY RESULTS: ARKANSAS V AUBURN (JAN 25)**

According to information gathered from surveyors from the Center for Business and Economic Research, 22.3 percent of game attendees were from outside Northwest Arkansas. This means that of the 12,794 individuals who attended the game, **2,857 were from outside Northwest Arkansas**. The game was played at 8 pm on a Wednesday. The average visitor from outside Northwest Arkansas spent $36.85 during the visit. Center researchers estimate that these individuals spent a total of **$105,271** in the Northwest Arkansas economy. The out-of-region visitors used **104 hotel or motel room nights**.

**SUMMARY OF SURVEY RESULTS: ARKANSAS V VANDERBILT (JAN 31)**

According to information gathered from surveyors from the Center for Business and Economic Research, 24.3 percent of game attendees were from outside Northwest Arkansas. This means that of the 13,678 individuals who attended the game, **3,328 were from outside Northwest Arkansas**. The game was played at 8 pm on a Tuesday. The average visitor from outside Northwest Arkansas spent $47.67 during the visit. Center researchers estimate that these individuals spent a total of **$158,643** in the Northwest Arkansas economy. The out-of-region visitors used **138 hotel or motel room nights**.

**SUMMARY OF SURVEY RESULTS: ARKANSAS V SOUTH CAROLINA (FEB 11)**

According to information gathered from surveyors from the Center for Business and Economic Research, 34.8 percent of game attendees were from outside Northwest Arkansas. This means that of the 16,100 individuals who attended the game, **5,597 were from outside Northwest Arkansas**. The game was played at 12:30 pm on a Saturday. The
average visitor from outside Northwest Arkansas spent $49.43 during the visit. Center researchers estimate that these individuals spent a total of $276,650 in the Northwest Arkansas economy. The out-of-region visitors used 292 hotel or motel room nights.

SUMMARY OF SURVEY RESULTS: ARKANSAS V FLORIDA (FEB 18)

According to information gathered from surveyors from the Center for Business and Economic Research, 39.6 percent of game attendees were from outside Northwest Arkansas. This means that of the 18,913 individuals who attended the game, 7,492 were from outside Northwest Arkansas. The game was played at 5 pm on a Saturday. The average visitor from outside Northwest Arkansas spent $39.18 during the visit. Center researchers estimate that these individuals spent a total of $293,536 in the Northwest Arkansas economy. The out-of-region visitors used 623 hotel or motel room nights.

SUMMARY OF SURVEY RESULTS: ARKANSAS V ALABAMA (FEB 23)

According to information gathered from surveyors from the Center for Business and Economic Research, 27.0 percent of game attendees were from outside Northwest Arkansas. This means that of the 12,320 individuals who attended the game, 3,327 were from outside Northwest Arkansas. The game was played at 6 pm on a Thursday. The average visitor from outside Northwest Arkansas spent $40.17 during the visit. Center researchers estimate that these individuals spent a total of $133,647 in the Northwest Arkansas economy. The out-of-region visitors used 209 hotel or motel room nights.

SUMMARY OF SURVEY RESULTS: ARKANSAS V OLE MISS (FEB 28)

According to information gathered from surveyors from the Center for Business and Economic Research, 26.1 percent of game attendees were from outside Northwest Arkansas. This means that of the 12,378 individuals who attended the game, 3,226 were from outside Northwest Arkansas. The game was played at 6 pm on a Tuesday. The average visitor from outside Northwest Arkansas spent $48.00 during the visit. Center researchers estimate that these individuals spent a total of $154,856 in the Northwest Arkansas economy. The out-of-region visitors used 141 hotel or motel room nights.

ATTENDANCE

Using the information from the surveys above, researchers from the Center were able to provide estimates of visitors at home basketball games that came from outside Northwest Arkansas. On average, 24.9 percent of game attendees on weekdays came from outside Northwest Arkansas and 33.8 percent of attendees on weekends came from outside Northwest Arkansas. In all, of the 235,498 attendees at all home basketball games during the 2011-12 season, 69,652 or 29.6 percent of attendees came from outside Northwest Arkansas.

### SPENDING BY VISITORS

Data collected from the surveys, provided per person estimates of spending by visitors from outside Northwest Arkansas. On average visitors at weekday games spent $43.17 and visitors at weekend game days spent $43.84. When these data are extrapolated to reflect the spending patterns of 69,652 visitors from outside Northwest Arkansas, the visitors spent $3,029,098 in the Northwest Arkansas economy or an average of $137,686 per game. This spending only includes the expenditures of attendees outside the basketball stadium and, as such, does not include spending on tickets, merchandise and concessions.

**SALES TAXES PAID BY VISITORS**

Using the visitor spending data above, researchers were able to estimate the sales taxes paid by visitors to the Northwest Arkansas area who were attending home basketball games. For the purpose of this study, the spending per game was used to calculate sales taxes accrued to the state at the sales tax rate of 6.0 percent and the sales taxes accrued to county and local governments in Northwest Arkansas at an average rate of 3.0 percent. The estimate provided below is conservative as some localities have additional taxes collected for hotel and motel rooms and prepared food purchased. In addition, liquor excise taxes and gasoline taxes are also not estimated. The 69,652 visitors paid $181,746 in state sales tax.
taxes and $90,873 in local sales taxes for a total of $272,619 in sales tax dollars for this region.

In addition, using data provided by the Athletic Department, visitors and residents paid $73,322 in sales taxes to the state and local governments on the purchases of merchandise and concessions while inside the arena. The sales tax rate used is from Fayetteville, since all merchandise and concession rates were made in Fayetteville. The local merchandise tax rate is 3.25 percent which reflects the Washington County and Fayetteville sales tax rate and the local concessions tax rate is 5.25 percent which reflects the Washington County and Fayetteville sales tax rate and the Fayetteville prepared food tax.

### HOTEL ROOMS OCCUPIED BY VISITORS

Data from the surveys of visitors to home basketball games provided researchers from the Center estimates of the number of hotel or motel room nights occupied by visitors at the games. As expected, games on the weekend resulted in more hotel and motel rooms being occupied by visitors. In all, over the course of 22 game days, 4,424 hotel room nights were occupied by visitors to the region.

MEALS EATEN BY VISITORS

The survey instrument used by students from the Center for Business and Economic Research also collected data on the number of meals eaten by visitors at the home basketball games. Using this information, researchers estimated that the visitors at home basketball games ate 99,759 meals in Fayetteville and 11,008 meals in other Northwest Arkansas cities. The visitors ate 26,614 breakfasts, 39,638 lunches and 44,515 dinners in Northwest Arkansas for a total of 110,766 meals eaten over the course of 22 game days.

VISITOR PLANS IN FAYETTEVILLE AND NORTHWEST ARKANSAS

Visitors that responded to the surveys conducted by students from the Center for Business and Economic Research provided information about the plans of their parties during their visit to attend a basketball game. The information derived from the surveys about the plans of visitors is provided by location in Fayetteville or other Northwest Arkansas cities. Weekday games saw 38.6 percent of visitors purchase fuel in Fayetteville and 4.8 percent purchased fuel in other Northwest Arkansas cities. 14.3 percent of visitors to weekday games also went retail shopping in Fayetteville, 6.7 percent purchased packaged liquor and 6.5 percent went to bars and nightclubs. On weekends, 43.9 percent of visitors purchased fuel, 32.8 went retail shopping in Fayetteville, 16.9 percent went to bars and nightclubs and 16.6 percent bought packaged liquor in Fayetteville.

Source: Center for Business and Economic Research Surveys and Estimates
Students from the Center for Business and Economic Research were present at two football games to survey patrons that were attending the games. The games surveyed allowed researchers from the Center to get spending data and this information was used to extrapolate spending estimates for games that were not surveyed. In all, there were 5 game days with home football games in Fayetteville during the 2011 season. Short summaries are provided for each of the individual games surveyed, followed by detailed tables on spending estimates for every home football game.

**SUMMARY OF SURVEY RESULTS: ARKANSAS V SOUTH CAROLINA (NOV 5)**

According to information gathered from surveyors from the Center for Business and Economic Research, 67.5 percent of game attendees were from outside Northwest Arkansas. This means that of the 73,804 individuals who attended the game, **49,809 were from outside Northwest Arkansas**. The game was played at 6:15 pm on a Saturday. The average visitor from outside Northwest Arkansas spent $92.69 during the visit. Center researchers estimate that these individuals spent a total of **$4,616,593** in the Northwest Arkansas economy. The out-of-region visitors used **4,697 hotel or motel room nights**.

**SUMMARY OF SURVEY RESULTS: ARKANSAS V TENNESSEE (NOV 12)**

According to information gathered from surveyors from the Center for Business and Economic Research, 66.0 percent of game attendees were from outside Northwest Arkansas. This means that of the 72,103 individuals who attended the game, **48,266 were from outside Northwest Arkansas**. The game was played at 5 pm on a Saturday. The average visitor from outside Northwest Arkansas spent $111.06 during the visit. Center researchers estimate that these individuals spent a total of **$5,287,179** in the Northwest Arkansas economy. The out-of-region visitors used **7,010 hotel or motel room nights**.

**ATTENDANCE**

Using the information from the surveys above, researchers from the Center were able to provide estimates of visitors at home football games that came from outside Northwest Arkansas. In all, of the 360,566 attendees at all home football games during the 2011 season, 241,373 or 66.9 percent came from outside Northwest Arkansas.

SPENDING BY VISITORS

Data collected from the surveys, provided per person estimates of spending by visitors from outside Northwest Arkansas. On average, visitors at the home games spent $101.87 per person. When these data are extrapolated to reflect the spending patterns of 241,373 visitors from outside Northwest Arkansas, the visitors spent $24,502,183 in the Northwest Arkansas economy or an average of $4,900,437 per game. This spending only includes the expenditures of attendees outside the football stadium and, as such, does not include spending on tickets, merchandise and concessions.

SALES TAXES PAID BY VISITORS

Using the visitor spending data above, researchers were able to estimate the sales taxes paid by visitors to the Northwest Arkansas area who were attending home football games. For the purpose of this study, the spending per game was used to calculate sales taxes accrued to the state at the sales tax rate of 6.0 percent and the sales taxes accrued to county and local governments in Northwest Arkansas at an average rate of 3.0 percent. The estimate provided below is conservative as some localities have additional taxes collected for hotel and motel rooms and prepared food purchased. In addition, liquor excise taxes and gasoline taxes are also not estimated. The 241,373 visitors paid $1,470,131 in state sales taxes and $735,065 in local sales taxes for a total of $2,205,196 in sales tax dollars for this region.

In addition, using data provided by the Athletic Department, visitors and residents paid $204,042 in sales taxes to the state and local governments on the purchases of merchandise and concessions while inside the stadium. The sales tax rate used is from Fayetteville, since all merchandise and concession rates were made in Fayetteville. The local merchandise tax rate is 3.25 percent which reflects the Washington County and Fayetteville sales tax rate and the local concessions tax rate is 5.25 percent which reflects the Washington County and Fayetteville sales tax rate, and the Fayetteville prepared food tax.

### HOTEL ROOMS OCCUPIED BY VISITORS

Data from the surveys of visitors to home football games provided researchers from the Center estimates of the number of hotel or motel room nights occupied by visitors at the games. As expected, visitors to football games occupied more hotel and motel rooms in Northwest Arkansas than did both baseball and basketball visitors. In all, over the course of 5 game days, 28,870 hotel room nights were occupied by visitors to the region.

MEALS EATEN BY VISITORS

The survey instrument used by students from the Center for Business and Economic Research also collected data on the number of meals eaten by visitors at the home football games. Using this information, researchers estimated that the visitors at home football games ate 836,965 meals in Fayetteville and 47,818 meals in other Northwest Arkansas cities. The visitors ate 240,266 breakfasts, 309,684 lunches and 334,833 dinners in Northwest Arkansas for a total of 884,783 meals eaten over the course of 5 game days.

OVERALL ECONOMIC IMPACT OF VISITORS AT RAZORBACK HOME GAMES

Over the course of 60 game days, nearly 720,000 people attended home games in baseball, basketball and football. About 342,000 of these attendees were from outside Northwest Arkansas and brought with them new economic activity to the Northwest Arkansas economy. This economic activity resulted in the renting of 35,805 hotel or motel room nights and the purchase of 1,065,106 meals in Northwest Arkansas. The overall economic impact of these visitors is estimate at nearly $30 million dollars on an annual basis. These visitors also generated at least $2.66 million dollars in sales taxes for the state and local governments.

Source: Center for Business and Economic Research Surveys and Estimates
The four major cities in Northwest Arkansas, Fayetteville, Springdale, Rogers and Bentonville are primary beneficiaries of the economic activity that is generated by the 342,000 people who visit the region to attend home basketball, baseball, and football games at the University of Arkansas. Home baseball and basketball games do not bring in as many visitors who take up hotel and motel rooms in Northwest Arkansas, but attendees at football games during the fall (September through November) occupied some 28,870 hotel or motel room nights in the area. As a result, in Fayetteville, fall hotel tax collections have been on average 14.2 percent higher than during the rest of the year since 2005, peaking at 22.0 percent higher in 2011. Springdale hotel tax collections have also been 20.6 percent higher in the fall. Part of the higher fall average in Springdale is explained by a hotel tax rate increase to 2.0 percent from 1.5 percent in September 2011. Hotel tax collections in Rogers were also higher in the fall since 2005, at an average rate of 14.3 percent. Finally, Bentonville hotel tax collections were also higher in the fall at an average rate of 13.0 percent since 2005. The higher hotel tax collections are indicative of the increased demand for hotel rooms in Northwest Arkansas as a result of the fall football games. The following four charts show the comparisons of the fall and yearly hotel tax collections in Fayetteville, Springdale, Rogers and Bentonville.
Part of the higher fall average in Springdale is explained by a hotel tax rate increase to 2.0 percent from 1.5 percent in September 2011.
FIGURE 3: ROGERS HOTEL TAX COLLECTIONS

Source: Rogers A&P Commission and Center for Business and Economic Research Estimates

FIGURE 4: BENTONVILLE HOTEL TAX COLLECTIONS

Source: Bentonville A&P Commission and Center for Business and Economic Research Estimates
The major cities in Northwest Arkansas also benefit economically from the meals eaten by visitors to the Athletic events on the University of Arkansas campus. Over the course of 60 game days on the University of Arkansas campus, more than 1.06 million meals are eaten in Northwest Arkansas by visitors to baseball, basketball and football games. The vast majority of these meals, some 884,783 meals, are eaten by visitors to the fall football games. Comparing the restaurant tax collections, also called the prepared food tax, we can understand the significant impact of these visitors on the local economy. In Fayetteville, restaurant tax collections are on average 2 percent higher in the fall when compared to the rest of the year, while in Bentonville, restaurant tax collections are 3 percent higher than the rest of the year. The cities of Springdale and Rogers do not collect these taxes.

FIGURE 5: FAYETTEVILLE RESTAURANT TAX COLLECTIONS

Source: Fayetteville A&P Commission and Center for Business and Economic Research Estimates
Similar to the story told by the hotel tax collections in Northwest Arkansas, the hotel occupancy rates collected by local Advertising and Promotion (A&P) Commissions show that hotels in Fayetteville, Rogers and Bentonville have higher occupancy in the fall due to the influx of visitors to football games. In Fayetteville, hotel occupancy is 2.5 percent higher in the fall than it is during the year while the fall hotel occupancy rate is 5.6 percent higher in Rogers and 8.2 percent higher in Bentonville. The Bentonville rate is significantly higher because the fall 2011 hotel occupancy rate was 14.6 percent higher than the rest of the year. This high rate in the fall of 2011 could be explained in part by the opening of Crystal Bridge in Bentonville. Springdale does not compile hotel occupancy rates.
FIGURE 7: FAYETTEVILLE HOTEL OCCUPANCY RATES

Source: Fayetteville A&P Commission and Center for Business and Economic Research Estimates

FIGURE 8: ROGERS HOTEL OCCUPANCY RATES

Source: Rogers A&P Commission and Center for Business and Economic Research Estimates
Visitors associated with the baseball, basketball and football games on the University of Arkansas campus generate significant economic activity that is estimated at nearly $30 million on an annual basis. The cities of Northwest Arkansas collect a 2 percent sales tax on the estimated $30 million dollars spent by visitors to the region. The 2 percent city sales taxes yielded an estimated $594,527 from visitors to baseball, basketball and football games. This represents 0.6 percent of the total sales tax collections of the four major cities in Northwest Arkansas. The average sales tax collections during the football season (September-November) are typically lower than the annual average sales tax collections, as much Christmas and holiday shopping typically occurs in December. The sales tax collections from these cities are presented in the following graphs.

CONSTRUCTION OF UNIVERSITY OF ARKANSAS ATHLETIC DEPARTMENT FACILITIES

Construction is a regular occurrence on the University of Arkansas campus. The Athletic Department has made several additions and modifications to athletic facilities over time and these activities produce significant economic impacts for the local and state economies. This section details the construction projects that the Athletic Department has completed and plans to accomplish in the future. Using information on construction costs associated with past, current and future projects, researchers from the Center for Business and Economic Research used IMPLAN to generate an economic impact estimates for the construction activity.

IMPLAN employs an input-output approach to evaluate the economic impact of construction activity in the state of Arkansas. This regional impact model enables the evaluation of the economic impact of specific activities like construction within an economy. The basic data sources for the current edition of the IMPLAN database and the model used in this study are the Input-Output Accounts of the United States, developed by the U.S. Department of Commerce, Bureau of Economic Analysis (BEA), and county income and employment data published by BEA and the Bureau of Labor Statistics (BLS). The model reflects 2010 industrial structure and technology, and 2010 prices (trade flows in the model are expressed in 2010 dollars) but economic impacts can be presented in current dollars of the construction time period. IMPLAN uses a 525-sector input/output model to measure the effects of three types of impacts: direct, indirect, and induced. Direct impacts consist of employment and purchases of goods and services in the region resulting from the activity being evaluated, in this case, construction on the University of Arkansas campus. Indirect (inter-industry) impacts consist of goods and services purchased by the firms, which supply inputs consumed in the direct activity. Induced impacts consist of increased household purchases of goods and services in the region by employees of direct and indirect employers. The model generates multipliers, which summarize the magnitude of the indirect and induced effects generated by a given direct change, to estimate changes in output, income, and employment. In other words, the multiplier is the ratio of total impact to direct impact.

COMPLETED UNIVERSITY OF ATHLETIC DEPARTMENT CONSTRUCTION

From 2002 to 2011, the Athletic Department embarked on numerous construction projects which have made additions or improvements to facilities on the University of Arkansas campus. These improvements and additions have affected the facilities of sports like football, soccer, gymnastics, and track and field, among others. The table below shows the breakdown of spending on construction by project and year. In total, between 2002 and 2011, the Athletic Department spent $164,825,727 on construction projects on the University of Arkansas campus. One of the biggest items on this expenditure was improvements and additions made at the Donald W. Reynolds Razorback Stadium.
Using IMPLAN, researchers from the Center for Business and Economic Research were able to estimate the economic impact of the construction activity by year of construction. The table below shows that the construction activity from 2002 to 2011 produced 2,024 direct jobs and 3,341 total jobs when indirect and induced impacts are considered. The construction produced $104,032,578 in labor income and a total economic impact of $288,653,131 during the 2002 to 2011 time period. All the dollar values shown in the table reflect current dollars of the year when the construction occurred.

In 2012, the Athletic Department is constructing a Football Center on the University of Arkansas campus. The facility will include a new locker room, team meeting rooms, athletic training room, equipment room, a student-athlete lounge and study area, coaches' offices, a recruiting reception area and a football museum. The project also involves the relocation of the football training fields. According to the Athletic Department, the project, which will be completed in time for the 2012 season, is estimated to cost $40 million. Using IMPLAN, researchers from the Center for Business and Economic Research estimate that this construction activity generates 340 jobs in direct employment and 561 jobs in overall employment when indirect and induced jobs are added. Detailed employment in the top ten industries affected is provided in the Appendix. The overall economic impact of the 2012 construction activity of the Athletic Department is estimated at $64,517,706.

PLANNED UNIVERSITY OF ARKANSAS ATHLETIC DEPARTMENT CONSTRUCTION

In 2011, the Athletic Department released a Facilities Master Plan which provides a long-term vision of the future improvements to athletic facilities on the University of Arkansas campus. The plan was coordinated with the overall campus growth plan and is intended to meet the long term needs of the student-athletes, coaches, fans and donors. The plan includes a range of estimated cost based on square footage projects. The twenty year plan is estimated cost between $212,300,000 and $264,950,000 to complete and affects the facilities of a wide range of sports at the University of Arkansas campus. A table is provided below that lists the facilities improvements planned over the next twenty years and cost estimates associated with each project. Further information provided by the Athletic Department indicated that projects worth about $150 million, listed in the twenty year plan are expected to be completed between 2012 and 2017. This study will only consider the economic impact of construction to be carried out over this five year range, worth $150 million.

Using IMPLAN, researchers from the Center for Business and Economic Research estimate that the five year construction activity, worth $150 million in 2012 dollars will generate 1,221 jobs in direct employment and 2,016 jobs in overall employment when indirect and induced jobs are added. Detailed employment in the top ten industries affected is provided in the Appendix. The overall economic impact of the current construction activity of the Athletic Department is estimated at $239,740,103.

OVERALL ECONOMIC IMPACT

Considering all the economic impacts detailed in this report, researchers are able to estimate an economic impact of the activities of the University of Arkansas Athletic Department. The majority of the economic benefits of the activities of the Athletic Department accrue to the Northwest Arkansas region. These benefits are also calculated on an annual basis and therefore represent the amount of the economic activity generated for one year. The Athletic Department had direct expenditures of $84,748,274 and total economic impact of $124,065,968, while visitors to home baseball, basketball and football games generated an additional $29,578,454. In total, this generated an economic impact of $153,644,422 on an annual basis. The economic multiplier associated with this impact is 1.81, which means that every dollar in Athletic Department expenditures generated $1.81 in benefits. The Athletic Department employs 260 individuals on a full-time basis and 982 people on a part-time or hourly basis.

As part of this economic impact, activities of the Athletic Department generated tax revenue worth $4,895,918 to state and local governments. Taxes collected by the state (income and sales taxes) accounted for $3,723,606 and local governments collected $1,172,312 in sales taxes.

Construction activity at the University of Arkansas Athletic Department also provided and will continue to provide significant one-time benefits. The current construction on the University of Arkansas campus supports 561 jobs and generates an economic impact of $64,517,706 and planned construction over the next five years will support 2,016 jobs and generate $239,740,103 in economic activity.

Expenditures came from 2010-11 data, while visitor impact came from the 2011-12 season. Assuming that expenditures remained constant, this estimate represents the annual impact.
Script:

Excuse me, are you a student? (If the interviewee answers yes, move on to another potential interviewee.)

Hello, my name is ____ and I am from the Center for Business and Economic Research at the University of Arkansas. We are conducting a study to estimate the impact of the University of Arkansas Athletic Program and I was wondering if I could ask you a few questions. Should you choose to participate; all information will be kept confidential to the extent allowed by law and University policy. No personally identifying information will be used in any publication resulting from this research. You are under no obligation to answer any particular question, and you may cease participation at any time. May I begin?

Survey Instructions:

In the reply to question 1, if interviewees indicate that their hometown is in Northwest Arkansas, thank them for their time and end the survey.
1. What is your hometown and zip code? Hometown: _____________________ Zip: ______
2. How many people are in your party? (including yourself)
   Number of Adults: _____  Number of Children: _____
3. What event brought you to Fayetteville today?
   ___ University of Arkansas v ______ Game (Date)  ___ Other: __________________
4. How many days do you plan on being in Northwest Arkansas? _____ # of Days
5. If your party is staying overnight in Northwest Arkansas, please indicate the number of nights for each applicable type of accommodation. If your party is staying in a hotel/motel or in a RV park, please specify the number of rooms/sites your party is occupying each night.
   Hotel/Motel  ___  Number of rooms ___
   RV Park  ___  Number of sites ___
   Friends/Family  ___
   Other  ___  ______________________
6. Please indicate the city of your overnight accommodations and/or the name of the Hotel/Motel you stayed in if applicable.
   City: ______________________________  Hotel/Motel: __________________________
7. Approximately how many times will your party purchase meals at Northwest Arkansas Restaurants?
   In Fayetteville?  Breakfast ___ (# of times) Lunch ___ (# of times) Dinner ___ (# of times)
   In other Northwest Arkansas cities? Breakfast ___ (# of times) Lunch ___ (# of times) Dinner ___(# of times)
8. Do you plan on purchasing food, merchandise, programs, or anything else while at the event? If so, please indicate how much you plan to spend (excluding ticket purchase).
   ___ Yes  If yes, amount: $ _______  ___ No
   Please indicate which of these your party plans to do while in Fayetteville or elsewhere in Northwest Arkansas:
   Fayetteville          Other Northwest Arkansas
   Purchase Fuel (Car or airplane)  ___Yes ___No  ___Yes ___No
   Retail Shopping  ___Yes ___No  ___Yes ___No
   Buy Groceries/Tailgating Gear  ___Yes ___No  ___Yes ___No
   Purchase Packaged Liquor  ___Yes ___No  ___Yes ___No
   Rent a Vehicle  ___Yes ___No  ___Yes ___No
   Use a Taxi  ___Yes ___No  ___Yes ___No
   See a Movie  ___Yes ___No  ___Yes ___No
   Go to a Bar/Nightclub  ___Yes ___No  ___Yes ___No
   Other things (haircut, tattoo, etc.)  ___Yes ___No  ___Yes ___No
9. Excluding payments for tickets and any money spent inside the stadium, approximately what is the TOTAL amount YOUR PARTY expects to spend in Northwest Arkansas on this trip?  Total: $___________
   Thank you. Please enjoy your stay.
